UNITED STATES OF AMERICA
DEPARTMENT OF TRANSPORTATION
OFFICE OF THE SECRETARY
WASHINGTON, D.C.

Issued by the Department of Transportation
on the 3rd day of June, 1999

ESTABLISHMENT OF THE STANDARD
FOREIGN FARE LEVEL

Docket 37554

ORDER

Section 41509(e) of Title 49 of the United States Code requires that the Department establish a Standard Foreign Fare Level (SFFL) by adjusting the SFFL base periodically by percentage increases in actual operating costs per available seat-mile (ASM). The SFFL becomes the benchmark for measuring the statutory non-suspend zone set forth in that section. Order 80-2-69 established the first interim SFFL, and Order 99-4-3 established the currently effective two-month SFFL applicable through May 31, 1999.

In establishing the SFFL for the two-month period commencing June 1, 1999, we have projected non-fuel costs based on the year ended December 31, 1998 data for all carriers, and have determined fuel prices on the basis of the latest available experienced monthly fuel cost levels as reported by the carriers.

Our calculations measure unit cost changes from October 1, 1979, to July 1, 1999, the mid point of the June 1 - July 31, 1999 projection period for the three ratemaking entities: Atlantic, Latin America and Pacific.

In projecting the SFFL adjustment effective June 1, 1999, the staff examined the latest available monthly fuel price data reported to the Department by the carriers, and used a least squares analysis to project fuel prices to July 1, 1999.

The resulting projections are fuel prices on July 1, 1999, of 37.71 cents per gallon in the Atlantic, 37.19 cents per gallon in Latin America and 43.96 cents per gallon in the Pacific.

Unit non-fuel costs for the 12 months ended December 31, 1998 increased 2.03 percent for the Atlantic Entity, decreased 3.00 percent for the Latin American Entity and increased 5.63 percent for the Pacific Entity over the year ended December 31, 1997.

Based on our calculations, we find the projected cost adjustment factor over the October 1, 1979 level to be 37.37 percent in the Atlantic, 33.06 percent in Latin America and 64.76 percent for the Pacific (See Appendix A). This results in changes from the last two-month SFFL projections of -0.30 percent for the Atlantic Entity,

-1.18 percent for the Latin American Entity and -0.20 percent for the Pacific Entity.

Accordingly, pursuant to Title 49 of the United States Code:

1. Effective June 1, 1999 fares may be increased by the following adjustment factors over the October 1979 level, as amended:

Atlantic	1.3737
Latin America	1.3306
Pacific	1.6476

2. We will serve a summary of this order upon all U.S. certificated air carriers and all foreign air carriers.

By:

A. BRADLEY MIMS
Acting Assistant Secretary for Aviation
and International Affairs

UNITED STATES OF AMERICA
DEPARTMENT OF TRANSPORTATION
NOTICE OF ORDER ADJUSTING THE
STANDARD FOREIGN FARE LEVEL INDEX
DOCKET 37554

SERVED JUNE 7, 1999

Section 41509(e) of Title 49 of the United States Code requires that the Department, as successor to the Civil Aeronautics Board, establish a Standard Foreign Fare Level (SFFL) by adjusting the SFFL base periodically by percentage changes in actual operating costs per available seat-mile (ASM). Order 80-2-69 established the first interim SFFL, and Order 99-4-3 established the currently effective two-month SFFL applicable through May 31, 1999.

In establishing the SFFL for the two-month period beginning June 1, 1999, we have projected non-fuel costs based on the year ended December 31, 1998 data, and have determined fuel prices on the basis of the latest available experienced monthly fuel cost levels as reported to the Department.

By Order 99-6-4 fares may be increased by the following adjustment factors over the October 1979 level:

Atlantic	1.3737
Latin America	1.3306
Pacific	1.6476
